Innovations in External Glulam and Bushfire-resisting Timber Windows and Cladding

*Bushfire resistance testing of
Western Red Cedar Windows
Image: WADIC*

The use of timber externally continues to grow in popularity and for good reason – it is aesthetically pleasing, a natural insulator, lightweight, has low embodied energy, excellent environmental credentials and if specified correctly, provides a durable and beautiful long lasting solution.

This free WoodSolutions seminar will showcase a range of current and new innovative approaches for external timber use in applications such as engineered columns and beams, cladding and bushfire resisting windows and doors. Industry experts will provide the details needed for proper specification and will present some of the excellent projects that showcase these products.

This seminar is a must for all building and design professionals including architects, building designers, engineers, certifiers, developers, builders, regulators and educators .

COST

Free for all design and building professionals

DATE

Thursday 12th March

VENUE

Engineers Australia, Level 11, 108 King William St. Adelaide

TIME

1.00 to 5.00 pm

CPD

Certificates of attendance available for all participants. Formal CPD available for architects.

PROGRAM & SPEAKERS

Overleaf

PROGRAM

- 1.00 - 1.10 pm** **Registration and welcome**
- 1.10 - 2.00 pm** ***External Timber Durability and Building with Timber in
Bushfire-prone Areas***
*Stephen Mitchell, WoodSolutions & Timber Development
Association*
- 2.00 – 2.45 pm** **Engineered Wood Products in External Applications**
Bruce Bell, Laminated Timber Supplies
- 2.45 – 3.15 pm** **Afternoon Tea & Networking**
- 3.15 – 4.00 pm** **BAL-29 Compliant Western Red Cedar Windows and Doors**
Bronwyn Foord, Window and Door Industry Council (WADIC)
- 4.00 - 4.45 pm** **Bushfire Resisting Timber Claddings**
Paul Kremer, Tilling
- 4.45 to 5.00 pm** **Panel Discussion**

REGISTRATION

DATE: Thursday 12th March 2015 (1.00 - 5.00pm)
